

HOLY TRINITY NEWS

January 14, 2024

At Holy Trinity short-term rehabilitation, we provide 24/7 medical care and therapeutic services to help a patient recover from an illness, surgery, or even an accident. The goal is to help the patient achieve independence and a better quality of life, thus no longer needing this type of focused care. This type of care usually lasts a few weeks but can last for a few months depending on the patient's needs and recovery rate. Unlike hospital settings, rehabilitation centers offer a more comfortable and welcoming environment for patients. Our goal at Holy Trinity is to help patients regain their strength, mobility, and independence so that they can return to their daily lives as quickly as possible.

We are proud of the facility and the care we provide working together. Our home is your home when needed. We could not do this without all the support which you provide us.

Please stop in for a tour of our beautiful facility anytime. We look forward to showing you around. Our days are filled with healing along with activities, entertainment, chair yoga, pet therapy, games, and social hours, all including our short-term rehabilitation patients. We know times of healing can be hard, we are here to uplift our residents as well as provide the best care for their recovery.

If your loved one or yourself needs short-term care, we hope you will choose Holy Trinity.

REMEMBER, DIVINE LITURGY is celebrated every Wednesday morning at 9:30 am.
